Other Important Information

TOUR GUIDE VS. TOUR LEADER

Tour Guide

Often locals with intimate knowledge of an area, its culture, and history. Their role entails providing commentary, routing the tour, and seeing that people have a good time. They are a licensed, qualified expert who supplies specific information on the history, art, architecture and culture of the city/village/attraction where they are guiding the tour. The guide meets the group at the required place and leaves it at

the end of the tour; they do not travel with the group.

Tour Leader

An experienced person tasked with ensuring the smooth operation of tours, as well as providing practical support to passengers throughout the whole trip. Their role primarily includes assisting with accommodation, transportation between locations, and communication with tour guides at each stop. A tour leader may provide general guidance around a city or village and offer information on the place visited on the bus. However, they are not required to have specific art, architecture, or historical knowledge. They are not allowed to provide a guided tour or commentary of a city/village/attraction once there and, if caught doing so, can be fined.

Please note: Tour leaders/guides are not a standard inclusion in all travel offers. Tour leaders/guides will only be made available when required to enhance the experience of the destination featured.

CLIMATE & AVERAGE TEMPERATURES

Adelaide Hills

Adelaide Hills' cool climate means vibrant whites are the lifeblood of the region with punchy expressions of sauvignon blanc and fine restrained chardonnay being the two traditional white varieties. However, with its unique topography that creates several microclimates, the region is also perfect for pinot gris and pinot grigio. Summer temperatures can range between highs of 23-26 degrees Celsius and lows of 12-14 degrees Celsius, winter temperatures can range between highs of 12-13 degrees Celsius and lows of 6-7 degrees Celsius.

Barossa Valley

The Barossa Valley is arguably Australia's most famous wine region. Classified as warm climate, the Barossa provides excellent conditions for full-bodied wines with shiraz, cabernet sauvignon and grenache dominating the red plantings. Summer temperatures can range between

highs of 27-30 degrees Celsius and lows of 13-15 degrees Celsius, winter temperatures can range between highs of 14-15 degrees Celsius and lows of around 5 degrees Celsius.

McLaren Vale

McLaren Vale is one of the most geologically diverse wine regions in the world with unique interactions between geology, soils, elevation, slope, aspect, rainfall, distance from the coast and macro-climatic differences all contributing factors. Summer temperatures can range between highs of 27-28 degrees Celsius and lows of 15-17 degrees Celsius, winter temperatures can range between highs of 15-16 degrees Celsius and lows of around 9 degrees Celsius.
